

Facade Brush Pro Finish 1285 NEW DESIGN

Product properties

Facade brush with ergonomic handle with good and secure grip, plastic parts are made from 100% recycled material. Optimised fibre mix with excellent application properties for all waterborne wood protection and facade products. Selected brush fibres that distribute paint efficiently and ensure high productivity, perfect for painting vertical surfaces. Can be mounted on the new Flügger extension pole. 2-component material selection and stainless steel ferrule prevents discoloration and provides long lifespan.

- Optimised fibre mix
- Plastic parts made from 100% recycled material
- Facade brush, Angle

Product use

Painting of facades and woodwork. Rinse the brush in water before use and work thoroughly into the paint. Store the brush in airtight packaging when not in use and avoid storing the brush in water.

Cleaning and Maintenance

Clean brushes using Fluren 59. Brush cleaner, Fluren 37 Basic cleaner or liquid soap. For non-aqueous paints, mineral turpentine can be used instead.

Useful Information

Disposal: Remove as much paint as possible from brushes before they are disposed of as small, combustible waste items.

Good practice

Remove as much paint as possible from tools before cleaning. Do not pour liquid paint residue or cleaning fluid down drains. Clean the paint residue from the brushes right up under the ferrule. Paint residue under the ferrule and between fibres will coagulate and result in brittle bristles. Avoid straining the bristles during drying and store the brush dry.

Technical Data

Product Type	Brushes
Brush	Synthetic
Shaft	2-component (recycled plastic and rubber)
Available Sizes	75 mm; 100 mm; 120 mm
Metal type	Stainless steel
